

# MARSTON'S BREWERY

## 4 OFF CONDITIONING TANKS

### Project Details:

Marston's brewery started brewing in Burton-on-Trent in 1834

Marston's came to Burton for the water that gives the beers the depth of flavour, character & crisp taste.

#### Overview:

Marston's 4 No conditioning tanks project was a challenge from start to finish, initial challenge came from having fixed point plinths to locate the vessel legs onto, this lead onto the challenge when fixing the platform to the tops of the tanks, any variegations at the bottoms on the legs had an effect on the way the platform fit together at the top.

The install happened over 2 weekends. Intensive Engineering resource was required to overcome a difficult site install.

#### What Musk provided:

- 4 No conditioning tanks
- 1 No fixed platform

#### Quote:

Khalid Aziz, Project Manager, Marstons.

Appreciate your support and professionalism with an excellent working relationship during this project.

I would be happy to recommend Musk to any of your potential clients.
